

Marketing Campaign Performance - Executive Summary

Overview:

The project generated 1.89M conversions across 1,881 campaigns with a total spend of \$47M, achieving strong performance compared to market benchmarks.

Key KPIs:

- Conversion Rate: 10.11% (High)
- Average CPC: \$2.52 (Efficient)
- Average CPA: \$24.92 (Competitive)

Platform Performance Insights:

- Google is the top-performing platform (highest conversions, lowest CPA)
- Facebook delivers the highest conversion rate
- Email is cost-efficient and stable
- Twitter is the weakest performer and requires optimization

Key Trends:

- Peak performance: Nov 2023 – Feb 2024
- 34% decline in campaign activity in H2 2024
- Longer campaigns consistently outperform short-term ones

Recommendations:

- Reallocate budget from Twitter to Google
- Prioritize Google and Facebook as core channels
- Adopt longer campaign durations for better results
- Monitor and stop underperforming campaigns early

Conclusion:

Overall campaign performance is strong. However, ROI can be improved by optimizing budget allocation and focusing on the highest-performing platforms.
